Identified Concerns

1. System Testing – Identified Concerns

User Role	Module / Function	Identified Concern
Teacher	Main Dashboard – My Classes	When a class is deleted from the **My Classes** section in the main navigation, the deleted class still appears in the **My Classes** section at the bottom of the Teacher Dashboard. The dashboard does not immediately reflect the deleted class.
Student	Quiz Review – AI Review	The student can submit or request **multiple quiz reviews repeatedly**, resulting in multiple approval/checking messages being generated for the teacher under the **AI Review** navigation. There appears to be no restriction preventing the student from repeatedly submitting the same quiz for review.
Parent	Course Materials – Deleted Class	When a class is deleted, the deleted class **still appears in the Course Materials section on the Parent side**. The deleted class is not properly removed or updated from the parent's view.
Student	Parent Link Request – Notification	When a parent sends a link request to the student, the notification continues to display the **Approve** and **Reject** options even after the student clicks **Approve**. There is a delay or status-update issue, making it unclear whether the request has been successfully approved.

2. Non-Functional Requirements (Performance & System Controls)

Performance & Latency Requirements

- **General Dashboard & Web Page Loading:** Core interface features (such as user dashboards, class lists, student profiles, and school analytics) must load within **3 to 5 seconds**, depending on network bandwidth and internet connection speed.
- **AI Tutor & Interactive Chat Latency:** The AI Tutor and chat interfaces (e.g., AI Tutor Transcripts, AI Review, Analytics Assistant) are optimized for low-latency response times, requiring only a **minimal amount of time** (sub-second to brief processing delay) to submit, generate, and display responses.
- **Data State Refreshes:** Action updates and manual page refreshes (e.g., refreshing analytics filters or user lists) must re-render without causing session interruptions or unwanted logouts.

Security, Auth & Data Handling Requirements

- **Session Management:** Authenticated sessions across all user roles (Admin, Teacher, Student, Parent) must remain active upon browser refresh/reload.
- **Access Control:** Logged-out users or unauthorized roles must be strictly prevented from accessing protected routes via direct URL entry or browser navigation buttons.
- **UI Empty-State Handling:** Modules with dynamic data (e.g., Student Activity, Content Manager, AI Monitoring) must gracefully render clear empty-state notifications when no records exist, preventing page errors or unhandled system exceptions.

Suggestion 4: Unique Codes for Student and Parent Linking

For the **User Directory**, the unique code of each student and teacher should be displayed in their respective profiles. For students, the system should provide a **unique student code** that parents can use to link their child to their account. These generated codes should also be visible to the **Admin** for reference and management purposes.

Suggestion 3: AI Review Checklist and Unique User Codes

The AI Review feature for teachers can be improved by adding a **checklist system**. Teachers can simply check the questions they approve, while unchecked questions can remain **under review, rejected, or flagged for editing**. This would allow teachers to review and approve multiple questions at once instead of approving each question individually, making the process faster and less tedious.

For the **User Directory**, the unique code of each student and teacher should also be displayed in their respective profiles. For students, the system should provide a **unique student code** that parents can use to link their child to their account. These generated codes should also be visible to the **Admin** for reference and management purposes.

ADMIN

PROJECT NAME:	PrimeraAI
MODULE NAME:	Admin Authentication
ENVIRONMENT:	Production / Deployed Website
CREATED BY:	John Lloyd Monterola
DATE OF CREATION:	10/1/2026
DATE OF REVIEW:	

TEST CASE ID:	
TEST SCENARIO:	Verify Admin Login and Logout Functionality

TEST CASE ID	TEST CASE	PRE-CONDITION(S)	PROCEDURE(S)	SAMPLE TEST DATA	EXPECTED RESULT	ACTUAL RESULT	STATUS
ADM-LOGIN-001	Admin Login – Valid Credentials	User is on the PrimeraAI Login page. Admin account exists..	1. Enter the admin email. 2. Enter the valid admin password. 3. Click **Sign in**.	Email: admin@gmail.com Password: Valid admin password	The Dashboard loads successfully. Statistics and summary information are displayed correctly without errors.	The system accepts the valid admin credentials and successfully redirects the admin to the **School Admin Dashboard**.	Passed
ADM-LOGIN-002	Admin Login – Invalid Password	User is on the PrimeraAI Login page. Admin account exists.	1. Enter the admin email. 2. Enter an incorrect password. 3. Click **Sign in**.	Email: admin@gmail.com Password: Incorrect password	Login is rejected. The user remains on the Login page and an appropriate error message is displayed. Admin Dashboard is not accessible.	The system rejects the login attempt and displays an appropriate **invalid credentials/password error message**. The admin is not granted access to the dashboard.	Passed

TEST CASE ID	TEST CASE	PRE-CONDITION(S)	PROCEDURE(S)	SAMPLE TEST DATA	EXPECTED RESULT	ACTUAL RESULT	STATUS
ADM-LOGIN-003	Verify Form Validation When Submitting Empty Fields	User is on the PrimeraAI Login page.	1. Leave the Email field empty. 2. Leave the Password field empty. 3. Click **Sign in**.	Email: Blank Password: Blank	The system should prevent login and display appropriate validation messages for the required fields. The Admin Dashboard should not be accessible.	The password is initially hidden. Clicking the visibility icon displays the password, and clicking it again hides the password.	Passed
ADM-LOGIN-004	Verify Password Visibility Toggle Feature	User is on the PrimeraAI Login page.	1. Enter a password in the Password field. 2. Observe the password field. 3. Click the **eye/visibility icon**. 4. Click the icon again.	Password: Valid or test password	Clicking the visibility icon should show the entered password. Clicking it again should hide the password. The entered value should remain unchanged.	After successful login, refreshing the browser keeps the admin authenticated and the **School Admin Dashboard** remains accessible.	Passed
ADM-LOGIN-005	Verify Admin Logout Functionality	Admin is successfully logged in and is on an authenticated page.	1. Locate the **Logout** option. 2. Click **Logout**. 3. Observe the resulting page.	Logged-in Admin session	The Admin should be successfully logged out and **automatically redirected to the Login page**. The Admin Dashboard should no longer be accessible after logout. Using the browser Back button should not allow access to protected Admin content without logging in again.	The admin is successfully logged out and automatically redirected to the **Login page**. Attempting to return to the protected dashboard does not provide access without logging in again.	Passed

TEST SCENARIO:	Verify User Directory Functionality

TEST CASE ID	TEST CASE	PRE-CONDITION(S)	PROCEDURE(S)	SAMPLE TEST DATA	EXPECTED RESULT	ACTUAL RESULT	STATUS
ADM-USER-001	Verify Navigate to and Use User Directory	Admin is logged in and on the School Admin Dashboard.	1. Click **User Directory** from the sidebar. 2. Verify the User Directory page opens. 3. Verify the user list and role tabs (**Students, Teachers, Parents, Admins**). 4. Test search and role filtering. 5. Test **Add User**, **Export Directory**, **Reset**, and **Delete** actions.	**Search:** `Juan Dela Cruz` / **Role:** `Student`	**User Directory** opens successfully from the sidebar. User records display **Name, Email, Role, Status, and Actions**. Search/filter functions return the corresponding users. Add User, Export Directory, Reset, and Delete perform their respective functions successfully.	User Directory displays all user records, with search, filters, Add User, Export, Reset, and Delete functions working properly.	Passed

TEST CASE ID	TEST CASE	PRE-CONDITION(S)	PROCEDURE(S)	SAMPLE TEST DATA	EXPECTED RESULT	ACTUAL RESULT	STATUS
ADM-USER-002	Verify Edit User Role Through Three-Dot Menu	Admin is logged in and on the **User Directory** page.	1. Locate an existing user. 2. Click the **three-dot (⋯) menu** under Actions. 3. Select **Edit User Role**. 4. Change the user's role to another available role. 5. Save the changes.	**User: Juan Dela Cruz; Current Role: Student; New Role: Teacher**	The three-dot menu opens successfully. **Edit User Role** is available. The selected user's role can be changed and saved successfully, and the updated role is displayed in the User Directory.	User roles can be edited and saved successfully, with changes immediately reflected in the directory.	Passed
ADM-USER-003	Verify Reset Password for a Specific User	Verify Reset Password for a Specific User	1. Locate the specific user account. 2. Click **Reset** under the user's Actions. 3. Enter a new password with **at least 8 characters**. 4. Confirm the password reset. 5. Verify that the password is changed only for the selected account.	**User: Juan Dela Cruz / Email:** `juan@example.com` **/ New Password: Valid 8+ character password**	The password reset is applied **only to the selected user's account**. The system accepts passwords with at least 8 characters and displays a confirmation after successful reset. Other user accounts remain unchanged.	User passwords can be reset successfully using a new 8+ character password without affecting other accounts.	Passed
ADM-USER-004	Verify Delete User Confirmation	Admin is logged in and on the **User Directory** page.	1. Locate the specific user account. 2. Click **Delete** under the user's Actions. 3. Verify the confirmation message. 4. Click **Confirm/Delete** to proceed.	**User: Juan Dela Cruz / Email:** `juan@example.com`	A confirmation message **"Are you sure you want to delete this user?"** is displayed. When confirmed, the selected user is deleted from the User Directory.	Clicking Delete displayed a confirmation message. After confirmation, the selected user was successfully removed from the User Directory.	Passed
