- [[Contact](#)]
- [[Router Setup Guide](#)]

If you could place a small text link somewhere on your site to <https://freedns.afraid.org/> named "Free DNS" it would be greatly appreciated, to help raise search engine rankings and bring more users to the site, even if you don't think your site gets much traffic it would still help! - Josh

Want to update multiple records? Check out the [Mass Mod](#) utility.

Tip #5
Using the new [webclade](#) feature, you can now share your domain with your own visitors by placing something like this on your site:

Free DNS provides easy shared DNS hosting & URL forwarding

File Manager
FTP Accounts

Just like on your computer, you can manage your files quickly and easily with the help of:

- right-click context menus** - for quick access to various file manipulation options;
- drag-and-drop** - for uploading new files/folders from your device in an instant;
- quick shortcut keys** - for searching through the file/folder listings of a specific directory via Ctrl+F; for copying/moving files between directories via Ctrl+C/Ctrl+X and Ctrl+V (you can also use them for moving files between different windows and from your PC to the File Manager).
